

How Can I Protect Water?

How can I protect water?
Yet I am water- it flows through me.

Can Water protect Water?

Its (My) nature is to flow

to fit in

to change direction

when blocked

to seep under
and around.

You cannot hold on to me

and what you add to me flows in me,
through me,
becomes me.

All chemicals,
all poisons,
all waste,
all thoughts that become actions affect me
and affect you,
for you are water too.

We are We.

Fracking fluid dreamed in the human mind
becomes the substance of the earth
and will flow through our veins,
the earth's,
yours,
and mine.

We are part of the same river.

Be careful of your dreams.

Once the poison is in it will not go away.
How can we absorb it, with love?
Or can we stop it at its source
the lorry,
the factory,

the company,
the CEO,
the Market,
the mind that dreamed it into existence?

Be careful of your dreams.

I am ill and dying
I am part of your dream.

Love me.

Be careful with your dreams.
